

SCORPION

Secure radio network for flood forecasting

*SECURE, REAL TIME
VERY HIGH AVAILABILITY*

*High availability,
dynamic routing*

*Short and reliable
data collection cycles*

*Energy management
for isolated sites*

*Supervision,
administration and
remote setting*

*Alerts by email or to
portable receivers*

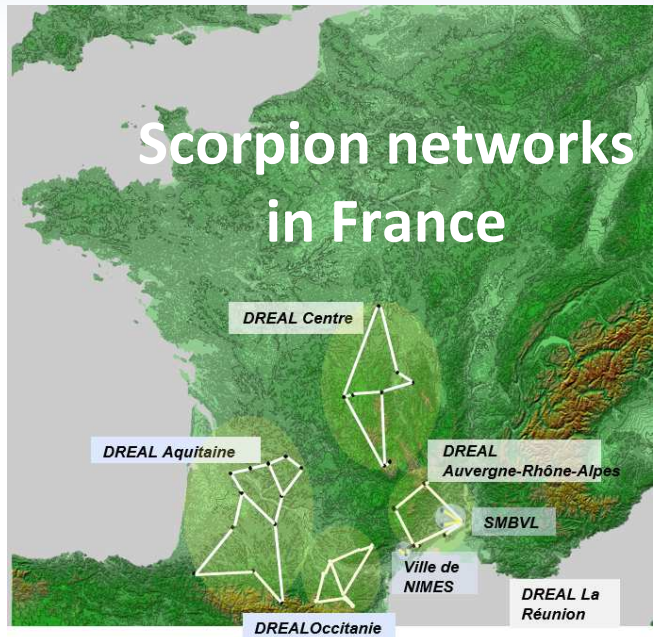

*Multiple interface
protocols*

*NUMEROUS LARGE-SCALE ACHIEVEMENTS IN
FRANCE AND ABROAD*

COVERS FROM 10 TO 100,000 KM²

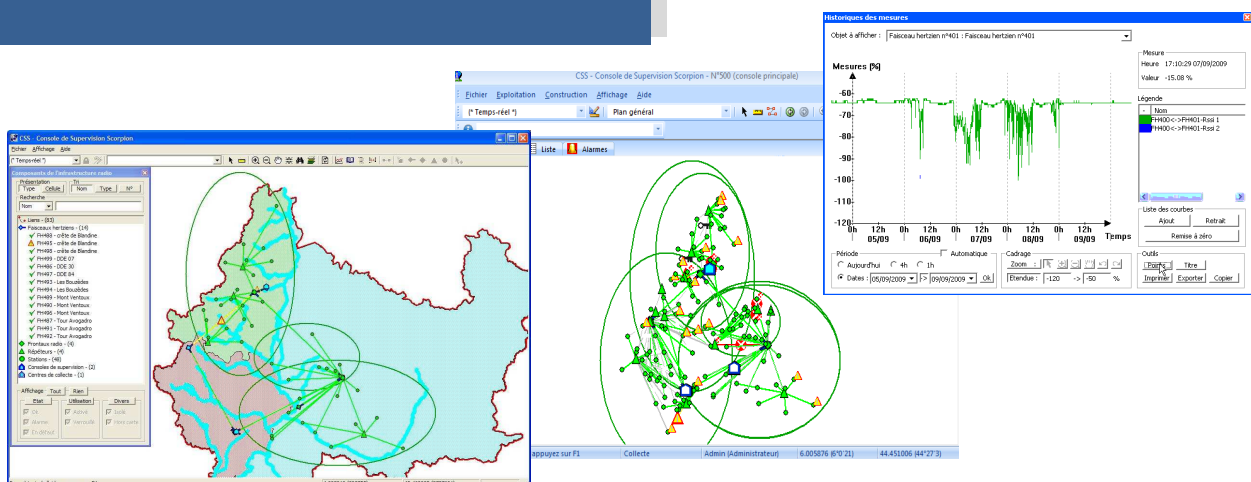

Flood forecasting

Extended radio networks
for hydrological data
collection in isolated sites

- ✓ Extended coverage for collecting hydrological and rainfall data
- ✓ Deployment on demand
- ✓ Stable and deterministic collection times even in extreme climatic situations
- ✓ Radio network ultra secure, redundant and self-healing
- ✓ Very low consumption for isolated sites without energy

CENTRALIZED ADMINISTRATION, REMOTE MONITORING
